## Dial Test Indicators

Comparison measuring instruments which ensure high quality, high accuracy and reliability.

## SERIES 513 - Lever-Type Dial Indicators

- Designed to probe surfaces that cannot be reached with a normal dial gauge. Useful both for alignment and for measurement purposes.
- Mitutoyo's proprietary new design permits smooth pointer operation.
- Strong frame provides excellent rigidity and durability.
- Non-magnetic pointer and contact point permit reliable operation even in magnetic environments.
- Clear and concise wide dial face allows excellent visibility.
- The surface of the crystal is hard-coated for excellent scratch resistance.
- Flat crystal makes graduations easy to read. Moreover, the 0 -ring sealing method used for the bezel prevents water or oil penetration. (Note that this type is NOT
waterproof.)
- Six types are available: horizontal, horizontal ( $20^{\circ}$ tilted face) vertical, parallel, universal, and pocket, allowing users to select the model most suited to their needs. Horizontal: Standard
Horizontal ( $20^{\circ}$ Tilted Face): Dial face inclined $20^{\circ}$, compared with the vertical type, allows easy reading. Vertical: Best suited for centering holes under the spindle of a machine tool. - Parallel: The scale can be read from the front, with the stylus pivoting in a plane parallel to that of the dial face.
Universal: The direction of the probe movement can be freely changed. Pocket: Compact type
- Dial test indicators with a ruby contact point are available in the horizontal (standard) type.
- Benefits of ruby contact points:

Several times more resistant to wear than carbide.
Can be used on electrical discharge machines without special precautions.

Feature icons

| Icon | Feature description |
| :--- | :--- |
|  | With revolution counter |

## Special Set: $\quad$ No. 513-908 (mm)

513-404E: Dial test indicator 7014: Mini magnetic stand No. 513-907 (inch)
513-402: Dial test indicator 7014E: Mini magnetic stand

Dial Test Indicator
SERIES 513 - Horizontal Type

- Provides easy access to shrouded surfaces that cannot be reached with conventional dial indicators.
- No-clutch structure for automatic reversal of measuring direction.
- Resistant to water and dust thanks to the onepiece bezel and 0 -ring seal for the crystal.
- The glare-free flat crystal face has a scratchresistant coating.
- High sensitivity and quick response due to low-friction jeweled bearings.
(

513-477E

513-471E

Ruby contact point models

- Higher resistance to wear - Non-magnetic, non-conductive tip allows use in EDM processes

Carbide contact point models

## Dial Test Indicator

## SERIES 513 - Horizontal ( $20^{\circ}$ Tilted Face), Vertical, and Parallel Types

513-445E

- Specially designed for easy viewing of dial.

- The dial face obliquely faces upward, allowing users to read the graduations from the user's side. It is convenient when probing on the side of a large workpiece and the workbench is high.

## Dial Test Indicators

Comparison measuring instruments which ensure high quality, high accuracy and reliability.

## Pocket Type Dial Test Indicator SERIES 513

- Jeweled bearings assure higher sensitivity and accuracy.
Indicator can be mounted by clamping the stem or the body (except for 513-517WE and 513-517WT).
- Reversible measuring direction (Clutch type).
- Two holding bars are supplied. (Full sets only.)
- Fully adjustable bezel/dial face.
- Stylus is adjustable within $220^{\circ}$.
- Bezel is sealed with on O-ring to keep out water and oil.

Stems with Knurled Clamp Ring

Mitutoyo

Swivel Clamps

- Can be used with Holding Bars.

Holding Bars

## Universal Holder

- Allows the indicator to be set at the desired attitude to the workpiece.

## Centering Holder

- Allows large diameter cylinders or holes to be centered on a machine tool.

901997 (.25" DIA. stem)

Styli, Stems and Holders
Optional Accessories for Pocket Type Dial Test Indicators

## Styli <br> (for Metric Models Only)

- Stylus length affects the scale factor of an indicator. The styli provided as standard give a scale factor of unity.
