There is little left to emphasize the importance of calibration of all the Monitoring & Measuring Devices used by you to achieve your product quality. Reliability in the calibration is one fact that can make your product a winner in today's competitive world.

We at BAKER understand and realize this very well, as this also is applicable to us. Because of this we have created a Standards Laboratory wherein care has been taken to ensure that all the required parameters for carrying out a reliable calibration are addressed & complied with appropriate Measurement technology and application of Metrology principles. Our **"Passion for Precision"** instills the Confidence in our Calibration -

OUR STANDARDS ROOM

77 Cubic Meters of Controlled environment houses the calibration equipment

- 20 +/- 1° Celsius with extremely low Temperature gradient.
- Humidity 50 +/- 5 % -- To achieve this the environment is humidified and then de-humidified to the correct value.
- Better than 1,00,000 Class Dust Count (0.0005mm particle size) with online Electrostatic Precipitator with Automatic cleansing.
- Illumination is maintained 700 Lux at the point of measurement.

Care taken to ensure the above environmental parameters:

- Air velocity is maintained at 30 feet per minute to ensure uniformity of temperature. 15% air inlet @ of 12,000 cfm of air with 15% fresh air continuous intake.
- Extensive insulation against external ingress of heat/cold and humidity
- Antistatic Flooring, Aprons and anti-flaking paint used to minimise dust.
- Double glazed glass vacuumised partitions used to prevent heat and sound conduction.
- Trench all around to avoid surface level high frequency vibrations from the shop floor. Extremely rigid tables with Granite Surface plates used for keeping the Calibration equipment with anti vibration pads to ensure vibration level is maintained within 0.001mm peak to peak.
- **Most importantly the environment is maintained 24x7, 365 days a year.**

Our equipment consists of:

- Gauge Block Calibration Center from Feinmess, Germany with a unique patented handling system for the slips during calibration to avoid even the minutest of scratches.
- SIP 550M Computer aided Universal Calibration and Measuring Machine with a finest resolution of 0.00001mm and two Carl Zeiss Universal Horizontal Metroscopes for calibration of Masters.
- Rank Taylor Hobson Talyrond 210 Roundness measuring machine
- Rank Taylor Hobson Surtronic 4+ surface finish analyzer.
- Sigma high precision electronic outside diameter calibration comparator.
- Co-ordinate Measuring Machine - DEA make model Micra 4.5.3.
- Basic standards - Gauge Block sets 'K' & 'O' Grade, Master Setting Rings (SIP & BAKER make)
- We are maintaining Traceability to National & International Standards as an ongoing exercise with all our standards being periodically calibrated from either Metas - Switzerland or from NPL - Delhi.

The laboratory is NABL accredited inline with ISO/IEC 17025:2005 "General Requirements for the Competence of Testing & Calibration Laboratories". For Scope of Accreditation, please refer page 18 & 19 of this price list.
